

Business Profile

Lewis Bass International Engineering Services was founded in 2009 as a new corporate entity spun off of Lewis Bass International, a safety consulting litigation firm originally formed in 1979. LBIES is a registered field evaluation body and an engineering safety consultant with over 30 years experience in our industry. We offer electrical evaluation services for unlisted equipment, SEMI S2/S8 evaluations for semiconductor equipment, CE Marking for Europe, and Thermography.

Our Service Portfolio

3rd Party Field Labeling

- Electrical evaluations for new machine installs/modifications/combinations of listed equipment to NFPA 70, 79, and 791 codes.
- Evaluating and helping you move unlisted equipment to new facilities.
- Custom-manufacture equipment evaluations.

CE Mark Evaluations for Europe

- Equipment design consultation to meet CE Mark Directives.
- Design gap analysis.
- Full evaluation of old and new equipment for shipment to Europe.

Thermographic Inspections

- A thermal scanning and predictive maintenance service.
- Complete temperature analysis of found anomalies utilizing ambient temperature or conductor temperature for comparison.
- Written report and narrative for every anomaly detected during the inspection.

Company Profile
